

Lifecycle of Plastics – Time periods

Cut out the time periods and put them on the table match the plastic products to the time taken to breakdown completely. Think about your answers.

Use the WWF sheet to check you are correct

|                     |                     |
|---------------------|---------------------|
| 20<br><i>years</i>  | 30<br><i>years</i>  |
| 200<br><i>years</i> | 400<br><i>years</i> |
| 450<br><i>years</i> | 500<br><i>years</i> |
